PROFESSIONAL SUMMARY

Results-driven UX/UI designer with experience in creating user-centered digital solutions that blend design principles with software development. Proficient in user research, wireframing, prototyping, usability testing, designing and coding applications that address social challenges, enhance user experiences and promote sustainability. Demonstrated ability to collaborate effectively with cross-functional teams and deliver user-centered solutions. Strong communication skills with a focus on continuous growth and learning in the field of UX design

EXPERIENCE

November 2021 -
June 2022

- **UX Design Intern**
Reesby | Remote

- Conducted user research, wireframing, and prototyping to create engaging and accessible interfaces for web and mobile
- Partnered with developers to optimize design handoffs and refine UI components for improved usability.
- Developing wireframes and task flows based on user needs
- Collaborating with Designers and Developers to create intuitive, user-friendly software
- Conduct concept and usability testing and gather feedback
- Create personas through user research and data
- Define the right interaction model and evaluate its success
- Develop wireframes and prototypes around customer needs
- Find creative ways to solve UX problems (e.g. usability, findability)
- Work with UI designers to implement attractive designs
- Communicate design ideas and prototypes to developers

January 2012 -
June 2014

- **Customer Experience Assistant**
Sakunda | Harare

- Managed customer interactions, ensuring timely resolution of inquiries and improved satisfaction scores
- Responding to customer inquiries promptly via various channels like phone, email, and social media
- Providing product information, pricing, and other relevant details to customers
- Resolving customer complaints or directing them to appropriate teams or individuals
- Processing orders, returns, and exchanges for customers
- Keeping accurate records of customer interactions, transactions, comments, and complaints
- Communicating and coordinating with other departments to resolve customer issues
- Maintaining a high level of professional expertise and knowledge about the company's products or services
- Providing feedback to the management regarding customer concerns or suggestions
- Working towards achieving established customer service goals and objectives
- Assisting in sales processes and working towards meeting sales targets

EDUCATION

In progress

- **University of the People**
Bachelor of Science in Computer Science
Expected Graduation: October 2027

PROJECTS

- **Telemedicine Platform (Full-Stack Project | August 2024)**
 - Designed and developed a user-friendly web application facilitating virtual consultations, appointment booking, and location-based doctor searches.
 - Delivered a secure, responsive solution using Node.js, MySQL, and HTML/CSS, ensuring compliance with healthcare data standards.
 - Deployed App
- **Opportunity Portal (Full-Stack Project | November 2024)**
 - Built an end-to-end job-matching platform with advanced search filters, job listings, and real-time application tracking for job seekers and employers.
 - Designed relational databases with MySQL to manage and optimize user data and application workflows.
- **Weather App (Python Project | December 2024)**
 - Created a real-time weather app using Python and APIs to provide up-to-date weather forecasts with city-based searches.
 - Designed a responsive interface showcasing live weather conditions in a user-friendly manner.
 - Deployed App
